

Vertilux Motorization Systems - 2" Horizontal Blinds

TECHNICAL CATALOG FOR: MOTORIZATION (LIFT AND TILT)

To motorize a 2" horizontal with Lift and Tilt capabilities, it is necessary to select a motor, use a set of Cord Take up parts, as many as you would have ladders, and the additional brackets and adapters. For controlling it, select a switch-plate, or use infrared (IR), or radio-frequency (RF) control system.

The MX80 motor is capable of up to 92 square feet of wood, (this is a blind of about 9 feet by 10 feet. The blind can be 13 feet tall for any material. For aluminum blinds, capacity is 172 square feet. Speed will run about 15-19 r.p.m. (8 Nm is the torque)
